

# Hutchison Data Migration to CSCS

## Introduction

The below documents outline the suggested data management guidelines for groups moving from Hutchinson to consider and use to ready themselves for data migrations. In addition to this we have included a guide, with attached workflow, detailing how group shared data will be moved from Hutchinson storage to new University storage systems which CSCS will assist in managing.

## Documents

Below is our guide on suggested data management principles which we would urge users and groups to read and engage with to ready their data to be moved from Hutchinson systems to University and other storage solutions.

Hutchinson Data s... guidance v4.docx

The below document outlines the process which will be used for migrating shared group data from Hutchinson systems to the University's Institutional File Storage (IFS) service which CSCS will be using to host groups data. More information on the service itself can be found [here](#).
